

ANTISTATIC SOLAR ARMOR

Easy to apply antistatic & antiadherent coating
for photovoltaic plants

DUST
REPELLENT

ANTI
ADHERENT

6 MONTHS
DURATION

EASY TO
APPLY

Benefits

- Antistatic and antiadherent protection **lasts up to 6 months** - reduces the adhesion of soiling thus **increasing energy production up to 5%**
- Designed to be **applied with a robot or a armbrush on tractor**
- **No need to rinse or additional steps** - mixed in the water and applied during normal cleaning operations
- **Readily biodegradable** and environment friendly - **pH neutral** and free of solvents
- **Certified by TÜV Sud and by PV manufacturers** - does not void the modules' warranty and is approved by 12 of the top 15 manufacturers
- Used preventively will **reduce the adhesion of contaminants** such as cement or stone dust - recommended after using the Cement Removal Agent

Applications

- PV solar plants, solar thermal plants, PV solar tiles, etc. on **dry and moderate climates**
