

D-Solar Defendor

easy-to-apply hydrophobic coating for solar panels, making it easier to maintain and clean

Benefits

- Its antiadherent properties reduce soiling adhesion on glass keeping the panel cleaner between cleanings and increasing the efficiency of the next wash
- Increases energy output by up to 6%
- Designed to be applied with a robot and/or tractor brush
- The water repellent and antiadherent properties of the coating last up to 1 year
- Removes water quickly promoting self-cleaning of the panel and reducing light diffraction on rainy days
- Certified by the German laboratory TÜV Sud according to EN 61215

Applications

- Hydrophobic coating for photovoltaic solar panels, thermal solar panels, photovoltaic solar tiles, etc.
- **Best suited for rainy regions**

Industries

- Installers of photovoltaic plants
- Solar panel cleaning companies
- Solar parks with their own maintenance teams

Available Formats

- 2kg drum
- 5kg drum
- 20kg drum
- 1000kg IBC
