

WATER SOFTENING AGENT

Treatment for hard & very hard water to prevent the appearance of limestone deposits

HARD
WATER

VERY
HARD
WATER

Benefits

- Highly effective in **capturing mineral ions**, present in hard and very hard water
- Results in **residue and spots-free cleaning**
- **Simplifies your water management** and prevents the need of investing in expensive filtration systems and consumables
- **Does not affect** the aluminum structure, silicone, or the ARC of the PV panels
- **Readily biodegradable** and solvent-free product
- After dilution, the **pH of the water remains unchanged**

Applications

- Treatment for water used on the cleaning of PV panels
