### ➤ ***VERSATILE WITH MANY VARIANTS:***

Customise the ibench® to suit your requirements! This bench fits perfectly into your space concept.

### ➤ ***INDIVIDUAL SIGNAGE OR DISPLAYS:***

Use the ibench® as an advertising medium and for sponsoring.

# *EASY TO INSTALL*

## *SELF-SUFFICIENT POWER SUPPLY WITH SOLAR PANELS*

With the ibench® you don't have to worry about infrastructural changes. Powerful solar panels integrated into the seat supply the bench with power.

## ***SOLAR PANELS INTEGRATED INTO THE SEAT***

Three monocrystalline solar panels each with 40 Wp produce enough energy for lighting, mobile charging and LTE router, enabling easy installation and virtually uninterrupted operation of the ibench® throughout the year, without additional power supply. Long-life, maintenance-free AGM batteries, which are optimally charged using sophisticated electronics, serve as a back-up for the solar power.

***The visible solar panels supply the ibench® with renewable energy for sustainably charging mobile devices.***

A shatter-proof Perspex screen protects the components against moisture and external mechanical influences.

## ***HYBRID VERSION: POWER BOOST FOR EXTRA POWER***

For tasks with a higher power demand such as charging e-bikes or electric scooters, the ibench® requires an external power supply. This is only required when the internal batteries are low on power. The operation of displays also requires this additional power supply (hybrid version).

# ***MULTI DEVICE CHARGING STATION***

## ***CONVENIENT CHARGING OF ELECTRONIC DEVICES***

For convenient charging of electronic devices. Two USB charging ports are available as well as two Qi charging pads for wireless charging. The ibench® also offers perfect charging options for the new mobility with e-bikes and electric scooters.

## **CHARGING SMARTPHONES ON THE GO**

A USB port on the sides of the ibench® and two Qi charging pads on the seat offer easy and convenient electronic device charging. Up to 4 mobile devices can be charged on the ibench® simultaneously.

***The USB ports are only for charging mobile devices; no data is downloaded or collected. Use is GDPR compliant.***

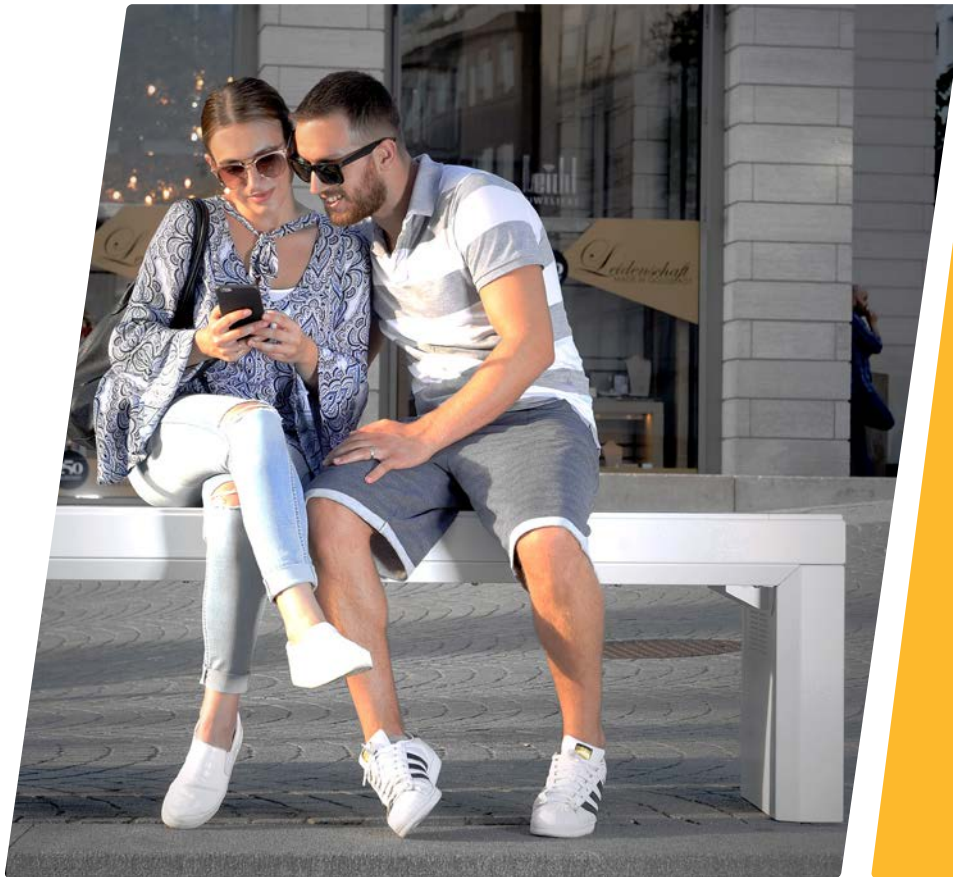

## **E-BIKES & ELECTRIC SCOOTERS**

E-bikes are charged with bike energy via an integrated DC fast charger. There is no contact with dangerous voltage, the battery does not need to be removed and charging is twice as fast than with a home charger.

The innovative magnet coupling also prevents damage to the bike or charging point.

# ***STRONG CONNECTIONS***

## ***WIFI, BLUETOOTH AND MUCH MORE***

Your new ibench® is a true connectivity marvel. Offer your visitors the option to use free Internet via Wi-Fi hotspot, listen to music with the built-in speakers via Bluetooth in stereo quality.

## **WIFI HOTSPOT**

A WLAN hotspot supplies anyone in the immediate vicinity with high-speed Internet.

***Free, high-speed internet access is quickly gaining in popularity and becoming an attraction, especially for users with low data volumes or in locations with poor network coverage.***

Make use of this effect for targeted controlling of visitors and guests in your community, on your campus or in your company. LTE routers, repeaters and wired routers (e.g. fibre) can be installed in the ibench® as an option.

## **BLUETOOTH STEREO SOUND**

An optional Bluetooth sound system can be integrated into the ibench® to make it a popular meeting place. Enable every visitor to connect to the ibench® via Bluetooth to listen to music.

You choose the volume and availability of the service.

# *COLLECTION OF ENVIRONMENTAL DATA*

## *INTELLIGENT COLLECTION VIA ENVIRONMENTAL SENSORS*

As standard, your new bench will enable you to collect environmental data, such as temperature and air humidity. This data is necessary for the reliable function of the ibench® and helps to assess the general condition of the bench.

## **ENVIRONMENTAL SENSORS**

In addition to temperature and humidity, you can also define other optional parameters - such as particulate matter - to build up an interesting supply of information.

This information is made available to you via an intuitive web interface, so that you can access required information at anytime and at any workplace.

## **INDIVIDUAL INTEGRATION OPTIONS**

Are there any other features you would like to integrate into the ibench®?

***As a manufacturer, we can customise the ibench® to suit your specific wishes and requirements. And, any integrations not mentioned here can also be easily carried out.***

***Feel free to contact us!***

# *LED LIGHTING*

---

## *ENERGY-EFFICIENT THANKS TO LED LIGHTING*

Your new street furniture is multifunctional. With the *ibench*<sup>®</sup> you get a bench that not only looks modern, but also sets accents for the perception of your public space with attractive features such as an LED downlight and displays.

## **LED DOWNLIGHT**

***Illuminated street furniture gives people a sense of security.  
At the same time, lighting elements are perfect for accentuating  
the surrounding area.***

The downlight is an LED-based, energy-saving ambient lighting arranged beneath the bench. This indirectly illuminates the area around the bench.

## **ACCENT LIGHT STRIP**

The accent light strip is attached to the edges of the bench and emphasises the silhouette of the bench®. It is a subtly luminous, homogeneous light strip with extremely low energy consumption. Decide for yourself which type of lighting best fits your street furniture concept.

***The light strip is available in 5 different colours.***

# DISPLAYS & ADVERTISING SPACES

## *DIGITAL SIGNAGE VIA INTEGRATED DISPLAYS*

With digital communication, you can always reach your target group - directly and effectively. With the ibench®, you represent - with little maintenance - a contemporary image that has a lasting impact on your success.

## **ADVERTISING SPACE**

The ibench® is available powder-coated in all RAL colours and can be freely designed by us (or by you) with conventional advertising technology.

***Use the side advertising spaces to convey your message or the bench can be sponsored by cooperation partners.***

## **SCREENS**

Information, entertainment and advertising: Depending on the screen and use, robust displays - suitable for outdoor use - can be integrated into the side panels and seat. These can be used for your own messages or for your advertising partners.

The content can be transferred via online streaming or data transfer.

# *ALL COLOURS, NUMEROUS SIZES*

## *EXACTLY CUSTOMISED TO MEET YOUR REQUIREMENTS*

The ibench® incorporates all functions and visual features befitting contemporary street furniture. There are no exceptions when it comes to our delivery options: Choose the size and colour of your ibench® that best fits your open space concept.

## ***FREE COLOUR SELECTION***

The powder coating used is robust and durable, which can also be cleaned with more aggressive agents to remove coarse dirt or stubborn graffiti.

## ***DIFFERENT SIZES***

On request and when ordering appropriate quantities, individual sizes or designs are available. This bench fits perfectly into your space concept.

*The ibench® is available in all RAL colours.  
Special colours are also available on request.*

*The ibench® is available in  
3 different standard sizes.*

A photograph of two women at night, one holding a smartphone and both looking at it. In the foreground, a white Messwerk device is visible with a QR code and the brand name. A yellow horizontal bar is at the top left. The background is dark with bokeh lights.
